# ez-wheel
### The Electric Wheel

# Smart control
## Technical datasheet

## ezRTH/W/IP

The ez-Wheel wireless tiller head control
**ezRTH/W/IP** is suitable for:
- Pusher-puller
- Food processing machine
- Outdoor applications

It ensures a proper handling of equipment thanks to ergonomic shapes and well organised commands. The integrated wireless interface allows a simple and quick integration on rolling equipment.

**Other functions:**
The interface remotely displays the battery level of the wheel and the system status. It is powered by its own internal battery.

Horn

✓ Bi-directional and ergonomic control
✓ IP65
✓ Warning horn
